

# DRINKING WATER NOTICE

## Monitoring requirements not met for the Gurney Elementary School

(PWS Name)

We are required to monitor your drinking water for specific contaminants due to exceeding the action level for lead and or copper during the June-September 2015 monitoring period. Results of this monitoring are an indicator of whether or not your drinking water meets health standards. We "did not monitor or test" or "did not complete all monitoring or testing" for pH, water temperature, alkalinity, calcium, conductivity, orthophosphate (when a phosphate inhibitor is used), and silica (when a silicate-containing inhibitor is used). In addition, we did not monitor with a minimum of one sample for lead and copper at each entry point in the distribution system, and therefore cannot be sure of the quality of your drinking water during that time.

### What Should I Do?

There is nothing you need to do at this time. You do not need to boil your water or take other corrective action.

### What is being done?

Upon being notified of this violation, the water supply was required to have the drinking water analyzed for the above mentioned parameters. The water supplier will take steps to ensure that adequate monitoring will be performed in the future.

For more information, please contact: James Nace at 440-247-5500 or 400 E. Washington St., Chagrin Falls, Ohio 44022

*Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.*
